

PROCESS FOR PRODUCING POLYCARBONATE
AND PRODUCTS THEREFROM

ABSTRACT OF THE DISCLOSURE

A process for making a shaped product from thermoplastic polycarbonate is disclosed. The process comprises producing polycarbonate melt by a method selected from the group consisting of phase interface and melt transesterification and introducing the melt directly into a forming apparatus to form a shaped product. The forming apparatus is selected from the group consisting of an injection molding machine and an extruder. The process is characterized in the absence therefrom of polycarbonate in granular form.
